Licencja rozszerzająca do oprogramowania ATS8600 – zwiększenie liczby podłączonych paneli SSWiN Guardall PX

One single interface controlling multiple complex systems

Security and facility management has evolved into a complex set of business functions, which all need to be managed taking safety and security of the staff, visitors and physical assets as a priority. There are numerous factors driving complexity: multiple sites, remote locations, flexible working hours, number of employees and visitors, as well as evolving needs.
Therefore only an integrated management solution is able to cope with this evolution, providing facility and security managers with a clear view and control over these different functions.
Imagine one interface to manage and control on-site or remotely all of your security needs on various premises, ranging from intrusion and fire detection to access control and video surveillance.
Imagine these different systems to interact thanks to a seamless integration enabling verification of events through video streams and linking intrusion and fire events with access control to safeguard the safety and security of people.

The whole is more than the sum of its parts

Digital video surveillance
Advisor management software supports a range of TruVision digital video recorders and network video recorders. Additional to the quality, ease of use and reliability of these video products, their integration into Advisor management software allows system operators to have direct access to live and recorded video, providing instant visual verification of events and alarms.
As a result, operators can focus on one interface to monitor their facilities rather than operating multiple separately running systems. This makes your security setup more efficient, responsive and reliable, saving valuable time and money.
In addition Advisor Management supports Truvision ANPR camera's where license plates can be managed while sending data to the camera as well as all relevant intrusion and/or access control devices.

Intrusion
Advisor Management software is supporting Advisor Master and Advisor Advanced control panels. It provides alarm management combined with video to quickly and efficiently resolve any alarm. It also allows easy configuration of persons requiring access to restricted areas.
In case of intrusion detection, the alarm is pinpointed on the floorplan and a relevant live video stream can be started automatically while lights and doors can be controlled by pressing one button. The presence of intruders is easily verified by switching to recorded video streams and the log file will keep track of the route followed.

Access control supporting multiple sites
Access Control based on Advisor Master, is providing complete access in multi-site environments where people need access to more

Szczegóły

- Zintegrowane oprogramowanie bezpieczeństwa do zarządzania systemami SSWiN, CCTV oraz sygnalizacji pożaru
- Obsługa wielu języków, osobny język dla każdego operatora
- Jeden interfejs użytkownika dla wszystkich urządzeń
- Intuicyjny wygląd interfejsu ułatwiający korzystanie
- 3 widoki umożliwiające pełną kontrolę oraz zarządzanie
- Zarządzanie i kontrola urządzeń KGS F&S
- Zarządzanie i obsługa alarmów z nadzorowanych urządzeń
- Zarządzanie i kontrola wielu obiektów
- Licencja bez limitu stacji klienckich
- Zarządzanie uprawnieniami użytkowników, kartami oraz kodami PIN
- Śledzenie wydanych identyfikatorów dla gości
- Bieżące wyświetlanie alarmów oraz ich lokalizacji na mapach
- Wysoka dostępność bazy danych dzięki technologii replikacji (mirroring)
- ATS8653 - zwiększenie liczby paneli Guardall PX: +1

than one site.
The Advisor management software is allowing a specific user to gain access where required and this via the same or distinct credential. All this is possible without having to add the user for each site or each credential.

Fire
The Advisor management system supports full integration of the FP1200/FP2000 fire alarm panels for event monitoring as well as control over the fire alarm system installation.
It provides the operator with an intuitive graphical user interface featuring graphical plans with events dynamically displayed on screen to assist in the rapid location of a fire. This allows for improved response time to fire events and other hazards thus reducing risks to life, property or the environment.
In case of a fire alarm, the location of the alarm will instantly appear on the screen. Activation of a live video stream allows verification of the presence of a fire and if needed, other video streams can be selected directly from the floor plan. When a raging fire has been confirmed, doors can be unlocked, sounders can be activated, elevators can be brought to the ground level, all while verifying the chain of events with the video system connected.
The security manager is in control and able to handle every event. Whenever an alarm is generated, it can immediately be supported by video, that can be retrieved easily at any time. One database for all functions linked to events, where access rights can be altered, is eliminating all chances for error.

ATS8653

Licencja rozszerzająca do oprogramowania ATS8600 – zwiększenie liczby podłączonych paneli SSWiN Guardall PX

Specyfikacja techniczna

General

Software type	Management software
Supported technology	Access Control, Fire, Intrusion, Video
Supported hardware	Advisor Advanced, ATS Master, Fire 2X, TruVision video

Software details

Software architecture	Client, Server
License type	Device driver

System requirements

Supported operating system	Windows 10, Windows 7, Windows 8
Database support	SQL

Sterownik rejestratora TruVision

Licencjonowana liczba paneli	+1
